Toepassingen-overzicht

Printtoepassingen opgebouwd uit de bibliotheek van atomen en componenten. Per toepassing: origineel, template en opbouw.

19 toepassingen, 21 versies, 59 nieuwe elementen (atomen, componenten, producten).

Lees dit zo

Origineel (referentie): getrouwe vector van het printbestand, inclusief bronkleuren en originele tekst. Alleen om mee te vergelijken.
Template: officiele merkkleuren uit tokens.json, juiste trim en 3 mm bleed (10 mm bij het uitritbord), variabelen als live Ubuntu-tekst of als gemarkeerde placeholder.
Snijcontour van stickers en bord staat in een eigen groep cut-contour (spotkleur ThruCut, 1 pt, 0,2 mm binnen de trim).
Opgebouwd uit: de ID's van bestaande en nieuwe elementen; elk element is een eigen groep, het label staat in een aparte grijze groep.
Derde-partij merken (betaal, partner, GLOW) staan er alleen als referentie in. Haal de officiele bestanden op.
Waargenomen regels en afwijkingen: docs/print-rules.md. Dit zijn regels uit de praktijk, geen officiele handboekregels.

py-atom-field-input-rounded

Abonnementsnummer:
py-comp-field-block-label-input

Specificatie

Bron: EvoluonPasjes.pdf p1,2 (CMYK; bleed box in bron nee). Template: trim 85 x 55 mm, bleed 3 mm, totaal 91 x 61 mm.

Variabelen: location-name = Evoluon; field-label-1 = Abonnementsnummer:; field-label-2 = Kenteken:

Source has no bleed box (art overshoots the page by 3 to 20 mm); templates are built with 3 mm bleed. Front: the beeldmerk at 1.508x (54.3 x 65.5 mm) runs 20.7 mm off the left, 10.0 mm off the top and 0.5 mm off the bottom; the part beyond the 3 mm bleed lies outside the template viewBox. Back: the source background overshoots the trim only 0.2 mm at the bottom and 3.3 mm at the top; the template runs the navy into 3 mm all round. The watermark is 5 percent (the Phase 1 document said 10 percent). The back lockup is the reverse lockup (white bubble, aqua dot) at 0.511x of the A6 lockup, centred on the card; the tagline is live text so it can be a variable. Card number and plate fields are blank in print (input fields only).

Victoriapark 4 | 5611 BM Eindhoven
py-comp-address-line-envelop

parkingyou
The other way of parking
py-comp-lockup-logo-tagline-color

Specificatie

Bron: ParkingYou_Envelop_220x156.pdf p1 (RGB (ICC), file claims PDF/X-1a; bleed box in bron nee). Template: trim 220 x 156 mm, bleed 3 mm, totaal 226 x 162 mm.

Variabelen: street = Victoriapark 4 ; postcode-city = 5611 BM Eindhoven

Source page 249.28 x 185.28 mm, trim 220 x 156 mm centred (offset 14.64 mm), no BleedBox. The reference is faithful and keeps the crop marks: two stroked paths, white 1.25 pt under black 0.25 pt (registration spot All in the source). OPEN POINT: the marks sit at 11.64 and 237.64 mm, i.e. 3 mm OUTSIDE the trim, at the bleed edge of a 226 x 162 mm area, and not at the trim edge; marks that are normally set to the trim would be at 14.64 and 234.64 mm. Confirm with the printer whether the 3 mm is meant as the bleed and which edge the marks refer to. The template has no crop marks (the printer's system adds them), 3 mm bleed (white, the envelope has no bleed content), coordinates relative to the trim. Lockup: py-comp-lockup-logo-tagline-color at scale 0.652 (beeldmerk 15.6 x 18.9 mm at x 20.39, y 18.23 relative to the trim, page 35.0, 32.9), then the address line comp below it (Ubuntu Light 2.47 mm, text origin x 40.64, baseline 58.1 minus 14.64 = 43.46 mm from the trim top, aligned with the wordmark left edge).

Evenementbord Parkeren GLOW (route)

py-comp-pill-destination

py-comp-pill-list-destinations

py-atom-icon-location-pin

Specificatie

Bron: Tekengebied_1.pdf p1, Tekengebied_4_kopie_4.pdf p1 (CMYK; bleed box in bron nee). Template: trim 297 x 420 mm, bleed 3 mm, totaal 303 x 426 mm.

Variabelen: background-colour = #1A3580; destination-1 = Philips stadion; arrow-1 = left; state-1 = active; destination-2 = DLL; arrow-2 = up; state-2 = active; destination-3 = TD-gebouw; arrow-3 = up; state-3 = active

A3 297 x 420 mm, no bleed in the source (background is exactly the trim), template adds 3 mm bleed. Navy background is the token #1A3580 (the source GLOW blue is CMYK 100/84.4/5.5/0.4, viewer #174797). White P is py-atom-symbol-p-plain scaled from 91.7 to 173.44 mm; Parkeren is Ubuntu Bold 35.28 mm. GLOW is the third party mark (reference only, source the official file). Pills: route = three active pills (Philips stadion arrow left, DLL arrow up, TD-gebouw arrow up); bestemming = Evoluon active with pin, Philips stadion and TD-gebouw inactive (25 percent, arrow left in print). Print arrows differ from the library arrows, see py-comp-pill-destination. Source details: the DLL label has a trailing space in the file (DLL and a space), label centres are set by eye per pill, pill pitch measured 51.61 and 51.41 mm (template uses 51.5). Variables: destination-N, arrow-N (left, up, pin), state-N (active, inactive).

Evenementbord Parkeren GLOW (bestemming)

py-comp-field-line-label

Handtekening klant
py-comp-field-signature-box

py-atom-logo-beeldmerk-color

Specificatie

Bron: Inleveren_Abbonementborg_A5.pdf p1 (CMYK; bleed box in bron nee). Template: trim 148 x 105 mm, bleed 3 mm, totaal 154 x 111 mm.

Variabelen: title = Bewijs van inlevering / toegangsmiddel; body-1 = ParkingYou bevestigt hierbij de ontvangst van he; body-2 = De bijbehorende borg wordt, na verwerking, terug; customer-name-label = Naam klant:; line-length = 83.5 mm; signature-label = Handtekening klant

Tekstcorrectie in template: "toegangs-/middel (manual hyphenation across two lines)" wordt "toegangsmiddel (word whole, paragraph reflowed to three lines)" (referentie houdt het origineel).

Tekstcorrectie in template: "Datum (trailing space)" wordt "Datum (no trailing space, right aligned to the end of the date field)" (referentie houdt het origineel).

Tekstcorrectie in template: "Naam klant: _____ (typed underscores)" wordt "Naam klant: plus a drawn navy rule of the same length (py-comp-field-line-label)" (referentie houdt het origineel).

The file is named A5 but the page is 148 x 105 mm (A6 landscape). No bleed in the source; the template has 3 mm bleed (white). Open question for the owner: the running text spells the brand 'ParkingYou' (capital P and Y) while the logo is set 'parkingyou'; kept as in the source, not changed. Reflow: with the word 'toegangsmiddel' whole, line 2 no longer fits in the text width, so paragraph 1 is set in three lines (leading 1.2 x 4.59 mm = 5.5 mm, as in the source) and the gap to paragraph 2 is 8.0 mm instead of 11.0 mm so the lower block (Naam klant, signature box) stays where it is in the source. The beeldmerk bottom right is the beeldmerk without wordmark (py-atom-logo-beeldmerk-color at 0.348x, 12.6 x 15.1 mm).

Bron: tien printbestanden (source/print). Referentie = getrouwe vectorweergave; template = officiële tokenkleuren, 3 mm bleed, variabelen als live tekst. Labels staan in aparte groepen.

py-comp-lockup-logo-tagline-color

®
py-atom-mark-registered

Specificatie

Bron: Briefpapier_nieuw.pdf p1 (CMYK; bleed box in bron nee). Template: trim 210 x 297 mm, bleed 3 mm, totaal 216 x 303 mm.

Variabelen: company = ParkingYou BV; street = Victoriapark 4; postcode-city = 5611 BM Eindhoven; email = info@parkingyou.nl; website = www.parkingyou.nl

Tekstcorrectie in template: "5611BM Eindhoven" wordt "5611 BM Eindhoven (space in the postcode, as on the envelope)" (referentie houdt het origineel).

A4 portrait, no bleed and no BleedBox in the source (page = trim, everything else is white paper); the template adds 3 mm bleed (white). Blank page below the header block. Lockup: py-comp-lockup-logo-tagline-color at scale 0.515 (beeldmerk 12.4 x 14.9 mm at x 20.2, y 12.2; the tagline is live text inside the comp, aqua), the registered mark py-atom-mark-registered 0.75 mm right of the wordmark, level with its top. Address block: recomposed from py-comp-address-block-brief (right edge 187.26 mm, 3.17 mm Ubuntu, Bold company line) as five live text lines with data-variable (company, street, postcode-city, email, website). The source address text is CMYK 100/85.5/22.3/4 (viewer #1E4382, a drifted blue, listed in observed); the logo is CMYK 100/83/0/17 (viewer #0B3D8A, equal to the token); the template uses #1A3580 for both. Open point: the source has no fold marks, hole punch mark or address window position; the owner may want to add them if the letterhead goes into window envelopes.

py-comp-url-chevron

py-comp-price-bubble-corner

py-comp-headline-two-colour

py-comp-lockup-location-garage

py-atom-symbol-p-garage-outline

Specificatie

Bron: InfoPylonBordGoed.pdf p1 (CMYK; bleed box in bron nee). Template: trim 600 x 840 mm, bleed 3 mm, totaal 606 x 846 mm.

Variabelen: background-colour = #1A3580; price = €7; price-decimals = ,50; unit = per dag; footnote-mark = *; url-line-1 = voordelig; url-line-2 = parkeren.nl; headline-1 = Midden; headline-2 = in de stad; headline-3-keyword = parkeren; headline-3-punctuation = ,; headline-4 = voor een; headline-5-keyword = prikkie; location-line-1 = Parking

Navy field 600 x 714.3 mm (runs 3 mm into the bleed at top, left and right), the lower 125.7 mm is white paper (no ink) with the garage lockup. The white price circle is a hole in the navy field in the source (paper shows through); the template draws it as a white shape. Reference keeps all outlines as extracted paths (headline, url, per dag, name); only the price is live text, rotated 21.8 degrees. Template: headline, url, price, unit and name are live Ubuntu text with data-variable. OPEN POINT (copy): the asterisk after per dag has no footnote anywhere on the panel; kept as in the source (variable footnote-mark). OPEN POINT (copy): the URL is split inside the domain (voordelig / parkeren.nl), kept as in the source. Fitted fonts (measured by overlay with the outlines): headline Ubuntu Regular/Bold 106.25 mm, URL line 1 Bold 37.7 mm, URL line 2 Light 34.4 mm, per dag upright Regular 34.17 mm, name Bold 46.7 mm. The Light weight and the upright Regular (instead of Medium Italic) differ from the brief and from the observed rule that Light is not used: owner to confirm.

Bron: tien printbestanden (source/print). Referentie = getrouwe vectorweergave; template = officiële tokenkleuren, 3 mm bleed, variabelen als live tekst. Labels staan in aparte groepen.

Specificatie

Bron: TariefConcerten.pdf p1 (RGB (ICC); bleed box in bron nee). Template: trim 700 x 1000 mm, bleed 3 mm, totaal 706 x 1006 mm.

Variabelen: background-colour = #1A3580; price = €20; label = inrijdtarief; headline = Let op!; body-line-1 = Aangepast inrijdtarief; body-line-2 = op de volgende data:; day-1 = 20; month-1 = juni; day-2 = 26; month-2 = juni; day-3 = 27; month-3 = juni

700 x 1000 mm, no bleed in the source (page = trim), template adds 3 mm bleed. No hidden or off-page leftovers: all 72 source paths are on the page; the two paths that stick out (the navy field and the speech bubble) are kept in the reference. Navy field: one huge source path (956 x 1272 mm, a speech bubble of radius 527 mm centred at 350.8 / 364.4 whose pointer lies at the bottom), only the part on the page is visible. The template rebuilds the visible part as a path (source path intersected with the page plus bleed): the lower left is cut by the arc, white paper below it up to x 350.8, then a vertical edge, and a second white wedge at the bottom right where the pointer curve leaves the page. Library: logo and tagline are py-comp-tagline-lockup at scale 2.52 (beeldmerk 73.0 mm high, library 28.95 mm), top left at 58.7 / 58.1 mm. Texts are live Ubuntu in the source and in the template: Let op! Bold 111.9 mm, two body lines Medium 55.95 mm (baselines 54 mm apart), all white; price and label are rotated 6.71 degrees counter clockwise inside the speech bubble.

Bron: posters_420x594_3_1.pdf p1 (RGB (ICC sRGB); bleed box in bron ja). Template: trim 420 x 594 mm, bleed 3 mm, totaal 426 x 600 mm.

Variabelen: photo = Foto van handen met telefoon (bubbelvorm); headline-1 = Makkelijk parkeren; headline-2 = vanuit je broekzak; subline = Download nu onze app; qr-target = https://parkingyou.nl/nl

A2 420 x 594 mm, the source has the 3 mm bleed (page 426 x 600) and a TrimBox. REBUILT in the template: the headline and the subline are outlined in the source and are rebuilt as live Ubuntu (Bold 28.2 mm for both headline lines, line pitch 26.75 mm, Regular 22.58 mm for the subline; fitted by overlay, width and height agree). The only listed font in the source is Helvetica for the QR, there is no live text. Library: py-comp-url-chevron at scale 0.456 (white text and chevron recoloured to navy and the light aqua sample #8CCDDF; the library chevron is #69CADA), py-atom-shape-bubble-image-mask at scale 8.717 (the photo clip outline has the same bubble shape; the tail tip differs by under 2 mm), py-atom-logo-beeldmerk-color (scale 0.578) and py-atom-logo-wordmark-color (scale 0.988). The library stacked logo py-atom-logo-stacked-color is NOT used: the print has 6.3 mm between the beeldmerk and the wordmark, the library 3.0 mm, so the two atoms are placed separately (group logo-stacked).

A3 297 x 420 mm, the source has the 3 mm bleed (page 303 x 426) and a TrimBox. REBUILT because the large pale bubble in the background is a raster in the source: it is rebuilt as a vector, the silhouette of the beeldmerk (shape of py-atom-logo-beeldmerk-watermark) scaled by 6.069 with the top left at 111.35 / 20.25 mm (page mm), cut at the right edge of the page. Fitted to the raster mask (overlap 99.98 percent, so the print bubble is the beeldmerk bubble, uniformly scaled to a 329.6 mm circle). Colour: the raster is flat #F5F6F9 in its palette and renders as #F7F8FA; the reference uses the rendered value, the template draws the navy token #1A3580 at 3.5 percent (same result, a tint as in observed rule 8; the library watermark is aqua at 5 percent and would look different). Library: py-comp-lockup-logo-tagline-color at scale 1.125 (118.0 mm wide), py-atom-icon-warning-triangle at 87.0 mm wide, recoloured to the light aqua sample #83CBE1 (no token, kept as sampled; the library triangle uses #71CBDF).

Specificatie

Bron: PR_RoadSignage.pdf p1 (RGB (ICC); bleed box in bron nee). Template: trim 210 x 297 mm, bleed 3 mm, totaal 216 x 303 mm.

Variabelen: background-colour = #1A3580; headline = A20 dicht?; body-line-1 = Parkeer nu ; keyword-1 = tijdelijk; keyword-2 = gratis; body-line-2 = op P+R; city = Schiedam; punctuation = .

A4 210 x 297 mm, no bleed in the source (the BleedBox is not set). Navy field with rounded bottom corners (radius 17.93 mm, measured from the path, bottom edge at 241.35 mm); the lower 55.7 mm is white paper (no ink) with the partner mark left and the colour lockup right. In the source the field overshoots the page at the top (to y -65.2 mm, the shape continues with rounded top corners off the page) and its sides lie exactly on the page edge (x 0 and 210); the template runs the field 3 mm into the bleed at top, left and right and keeps the trim shape of the bottom edge and corners (a small step at the corner centre height lies in the bleed and is cut off). P+R symbol: comp py-comp-symbol-pr placed at its source position (bars 88.0 mm wide, the label is live text, variable label). Headline A20 dicht? Ubuntu Medium 24.69 mm white (variable headline). Divider: white stroke 4 pt (1.41 mm) from x 7 to 203 mm at y 126.5, the pattern of py-atom-line-divider (the library atom is 0.706 mm, here drawn with Doc.line at 1.41 mm).

Bron: tien printbestanden (source/print). Referentie = getrouwe vectorweergave; template = officiele tokenkleuren, 3 mm bleed, variabelen als live tekst. Labels staan in aparte groepen.

Variabelen: heading-nl = Let op!; body-nl-1 = Auto op slot en; body-nl-2 = geen waardevolle; body-nl-3 = spullen achterlaten; heading-en = Please note!; body-en-1 = Lock your car and; body-en-2 = remove all of your; body-en-3 = valuables; callout-text = Verdachte situatie? Bel; phone-number = 0900-8844

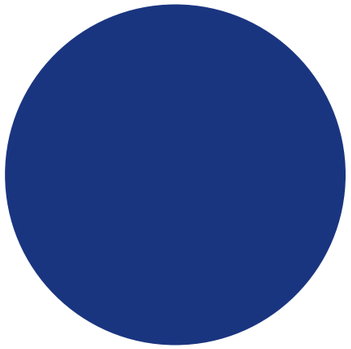

Snijcontour: groep cut-contour, spot ThruCut, 1 pt, 0.2 mm binnen de trim. Proposal: the source has no cut contour. Corner radius 4.2 mm is the radius seen on the footer bar (4.23 mm); to be confirmed by the owner.

White sticker, no background fill: only the footer bar runs into the bottom bleed (template: to the bleed edge, 3 mm; the source overshoots 4.3 mm). All text is navy token #1A3580 (source drifted blue CMYK 100/86.3/21.5/3.5), Ubuntu, centred, leading 1.2: headings Bold 21.17 mm, body Regular 14.11 mm with bold keywords 'op slot', 'geen waardevolle spullen', 'Lock', 'remove'. Divider navy 1 pt, 127.5 mm. Footer text white 7.76 mm: callout Regular, phone number Bold. The padlock stays light aqua (#68CBDA as sampled, no token). Original copy kept, no spelling errors found. Variables: headings, body lines (bold runs), callout text, phone number. The cut contour is a proposal (no contour in the source).

Bron: tien printbestanden (source/print). Referentie = getrouwe vectorweergave; template = officiële tokenkleuren, 3 mm bleed, variabelen als live tekst. Labels staan in aparte groepen.

Nieuwe atomen (1/3)

Elk element op eigen schaal (past in zijn cel); echte maat staat in het label. [third-party] = alleen referentie, officieel bestand ophalen.
