parkingyou

Toepassingen-overzicht

Printtoepassingen opgebouwd uit de bibliotheek van atomen en componenten. Per toepassing: origineel, template en opbouw.

28 toepassingen, 32 versies, 58 nieuwe elementen (atomen, componenten, producten).

Lees dit zo

Origineel (referentie): getrouwe vector van het printbestand, inclusief bronkleuren en originele tekst. Alleen om mee te vergelijken.
Template: officiele merkkleuren uit tokens.json, juiste trim en 3 mm bleed (10 mm bij het uitritbord), variabelen als live Ubuntu-tekst of als gemarkeerde placeholder.
Snijcontour van stickers en bord staat in een eigen groep cut-contour (spotkleur ThruCut, 1 pt, 0,2 mm binnen de trim).
Opgebouwd uit: de ID's van bestaande en nieuwe elementen; elk element is een eigen groep, het label staat in een aparte grijze groep.
Derde-partij merken (betaal, partner, GLOW) staan er alleen als referentie in. Haal de officiele bestanden op.
Waargenomen regels en afwijkingen: docs/print-rules.md. Dit zijn regels uit de praktijk, geen officiele handboekregels.

Toepassingen en nieuwe elementen

Elke toepassing: origineel, template en opbouw uit bestaande en nieuwe elementen

Toepassingen

ID	Naam	Type	Trim (mm)	Pagina
py-app-brand-background-tagline	Merkachtergrond met tagline	brand-background	148 x 105	3

py-atom-field-input-rounded

Abonnementsnummer:
py-comp-field-block-label-input

Specificatie

Bron: EvoluonPasjes.pdf p1,2 (CMYK; bleed box in bron nee). Template: trim 85 x 55 mm, bleed 3 mm, totaal 91 x 61 mm.

Variabelen: location-name = Evoluon; field-label-1 = Abonnementsnummer:; field-label-2 = Kenteken:

Source has no bleed box (art overshoots the page by 3 to 20 mm); templates are built with 3 mm bleed. Front: the beeldmerk at 1.508x (54.3 x 65.5 mm) runs 20.7 mm off the left, 10.0 mm off the top and 0.5 mm off the bottom; the part beyond the 3 mm bleed lies outside the template viewBox. Back: the source background overshoots the trim only 0.2 mm at the bottom and 3.3 mm at the top; the template runs the navy into 3 mm all round. The watermark is 5 percent (the Phase 1 document said 10 percent). The back lockup is the reverse lockup (white bubble, aqua dot) at 0.511x of the A6 lockup, centred on the card; the tagline is live text so it can be a variable. Card number and plate fields are blank in print (input fields only).

py-comp-pill-destination

py-comp-pill-list-destinations

py-atom-icon-location-pin

Specificatie

Bron: Tekengebied_1.pdf p1, Tekengebied_4_kopie_4.pdf p1 (CMYK; bleed box in bron nee). Template: trim 297 x 420 mm, bleed 3 mm, totaal 303 x 426 mm.

Variabelen: background-colour = #1A3580; destination-1 = Philips stadion; arrow-1 = left; state-1 = active; destination-2 = DLL; arrow-2 = up; state-2 = active; destination-3 = TD-gebouw; arrow-3 = up; state-3 = active

A3 297 x 420 mm, no bleed in the source (background is exactly the trim), template adds 3 mm bleed. Navy background is the token #1A3580 (the source GLOW blue is CMYK 100/84.4/5.5/0.4, viewer #174797). White P is py-atom-symbol-p-plain scaled from 91.7 to 173.44 mm; Parkeren is Ubuntu Bold 35.28 mm. GLOW is the third party mark (reference only, source the official file). Pills: route = three active pills (Philips stadion arrow left, DLL arrow up, TD-gebouw arrow up); bestemming = Evoluon active with pin, Philips stadion and TD-gebouw inactive (25 percent, arrow left in print). Print arrows differ from the library arrows, see py-comp-pill-destination. Source details: the DLL label has a trailing space in the file (DLL and a space), label centres are set by eye per pill, pill pitch measured 51.61 and 51.41 mm (template uses 51.5). Variables: destination-N, arrow-N (left, up, pin), state-N (active, inactive).

Evenementbord Parkeren GLOW (bestemming)

py-comp-field-line-label

Handtekening klant
py-comp-field-signature-box

py-atom-logo-beeldmerk-color

Specificatie

Bron: Inleveren_Abbonementborg_A5.pdf p1 (CMYK; bleed box in bron nee). Template: trim 148 x 105 mm, bleed 3 mm, totaal 154 x 111 mm.

Variabelen: title = Bewijs van inlevering / toegangsmiddel; body-1 = ParkingYou bevestigt hierbij de ontvangst van he; body-2 = De bijbehorende borg wordt, na verwerking, terug; customer-name-label = Naam klant:; line-length = 83.5 mm; signature-label = Handtekening klant

Tekstcorrectie in template: "toegangs-/middel (manual hyphenation across two lines)" wordt "toegangsmiddel (word whole, paragraph reflowed to three lines)" (referentie houdt het origineel).

Tekstcorrectie in template: "Datum (trailing space)" wordt "Datum (no trailing space, right aligned to the end of the date field)" (referentie houdt het origineel).

Tekstcorrectie in template: "Naam klant: _____ (typed underscores)" wordt "Naam klant: plus a drawn navy rule of the same length (py-comp-field-line-label)" (referentie houdt het origineel).

The file is named A5 but the page is 148 x 105 mm (A6 landscape). No bleed in the source; the template has 3 mm bleed (white). Open question for the owner: the running text spells the brand 'ParkingYou' (capital P and Y) while the logo is set 'parkingyou'; kept as in the source, not changed. Reflow: with the word 'toegangsmiddel' whole, line 2 no longer fits in the text width, so paragraph 1 is set in three lines (leading 1.2 x 4.59 mm = 5.5 mm, as in the source) and the gap to paragraph 2 is 8.0 mm instead of 11.0 mm so the lower block (Naam klant, signature box) stays where it is in the source. The beeldmerk bottom right is the beeldmerk without wordmark (py-atom-logo-beeldmerk-color at 0.348x, 12.6 x 15.1 mm).

Bron: elf printbestanden (source/print). Referentie = getrouwe vectorweergave; template = officiele tokenkleuren, 3 mm bleed, variabelen als live tekst. Labels staan in aparte groepen.

py-comp-url-chevron

py-comp-price-bubble-corner

py-comp-headline-two-colour

py-comp-lockup-location-garage

py-atom-symbol-p-garage-outline

Specificatie

Bron: InfoPylonBordGoed.pdf p1 (CMYK; bleed box in bron nee). Template: trim 600 x 840 mm, bleed 3 mm, totaal 606 x 846 mm.

Variabelen: background-colour = #1A3580; price = €7; price-decimals = ,50; unit = per dag; footnote-mark = *; url-line-1 = voordelig; url-line-2 = parkeren.nl; headline-1 = Midden; headline-2 = in de stad; headline-3-keyword = parkeren; headline-3-punctuation = ,; headline-4 = voor een; headline-5-keyword = prikkie; location-line-1 = Parking

Navy field 600 x 714.3 mm (runs 3 mm into the bleed at top, left and right), the lower 125.7 mm is white paper (no ink) with the garage lockup. The white price circle is a hole in the navy field in the source (paper shows through); the template draws it as a white shape. Reference keeps all outlines as extracted paths (headline, url, per dag, name); only the price is live text, rotated 21.8 degrees. Template: headline, url, price, unit and name are live Ubuntu text with data-variable. OPEN POINT (copy): the asterisk after per dag has no footnote anywhere on the panel; kept as in the source (variable footnote-mark). OPEN POINT (copy): the URL is split inside the domain (voordelig / parkeren.nl), kept as in the source. Fitted fonts (measured by overlay with the outlines): headline Ubuntu Regular/Bold 106.25 mm, URL line 1 Bold 37.7 mm, URL line 2 Light 34.4 mm, per dag upright Regular 34.17 mm, name Bold 46.7 mm. The Light weight and the upright Regular (instead of Medium Italic) differ from the brief and from the observed rule that Light is not used: owner to confirm. Blue in the sour

Bron: elf printbestanden (source/print). Referentie = getrouwe vectorweergave; template = officiele tokenkleuren, 3 mm bleed, variabelen als live tekst. Labels staan in aparte groepen.

Specificatie

Bron: 15728501-1.pdf p1 (CMYK (PDF/X-4, FOGRA39), spot ThruCut; bleed box in bron ja). Template: trim 800 x 250 mm, bleed 10 mm, totaal 820 x 270 mm.

Variabelen: background-colour = #1A3580; destination-word = Uit

Snijcontour: groep cut-contour, spot ThruCut, 1 pt, 0.2 mm binnen de trim. source contour 799.6 x 249.6 mm, magenta 1 pt stroke on the spot ThruCut

800 x 250 mm trim, 10 mm bleed (page 820 x 270). Navy stadium with elliptical ends (rx 133.3, ry 125 mm); the template draws one navy shape into the bleed (rx 143.3, ry 135 mm, the 10 mm offset of the trim shape; the source bleed shape is 820 x 273.5 mm and sticks 1.7 mm out of the page). Cut contour: ThruCut, 1 pt magenta stroke, 0.2 mm inside the trim, elliptical ends (the source contour is the stroke path, kept in the reference as group cut-contour). Library check: py-atom-picto-car matches the print car (same proportion, scale 6.79) and py-atom-arrow-up-circle matches the print circle and arrow (scale 1.268, arrow share 0.706). The library arc py-comp-route-module-separator has the same shape but would print with a 5.3 mm stroke instead of 3.0 mm, so the print arc is extracted as the variant py-comp-route-module-separator-uitrit (py-atom-shape-separator-arc is the handbook illustration in grey and navy, not the aqua arc). Uit is live Ubuntu Bold 167.84 mm, white (fitted by overlay, width and height agree). Blue in the source is CMYK 100/92.5/19.2/5.9 (the most drifted blue), aqua

Specificatie

Bron: LaadKabel.pdf p1 (CMYK; bleed box in bron ja). Template: trim 250 x 300 mm, bleed 3 mm, totaal 256 x 306 mm.

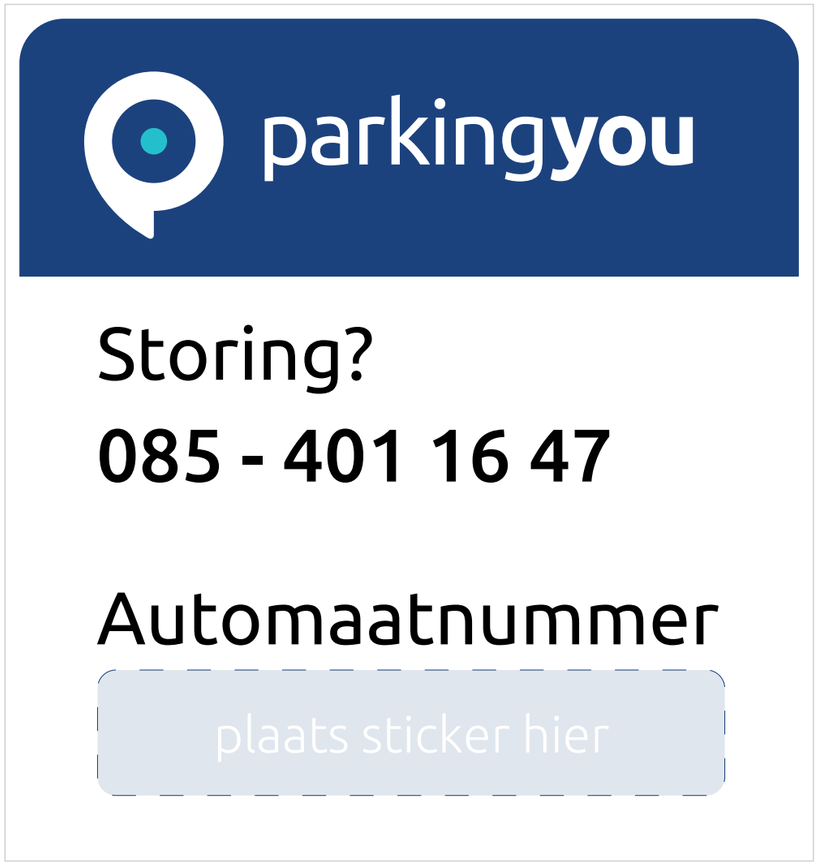

Variabelen: background-colour = #1A3580; nl-text-1 = Kabel terughangen; nl-text-2 = na gebruik; en-text-1 = Return cable to; en-text-2 = hook after use.

Snijcontour: groep cut-contour, spot ThruCut, 1 pt, 0.2 mm binnen de trim. Proposal: the source has no cut contour. Corner radius 4.2 mm is borrowed from the diefstal footer bar (4.23 mm); to be confirmed by the owner.

Layout measured on LaadKabel.pdf: navy background into the 3 mm bleed, plug icon (light aqua, kept as sampled #68CBDB, no token), NL/EN text Ubuntu 21.47 mm white leading 1.2 centred, white divider 0.706 mm x 170.6 mm, library logo py-atom-logo-horizontal-white scaled by height (beeldmerk 11.1 mm, logo about 40 mm wide) centred at the bottom. The source blue is CMYK 100/85.9/6.6/0 (drift); the template uses the token blue. Variables: NL text lines and EN text lines as live text (the bold phrases are runs). The cut contour is a proposal: no contour in the source, radius 4.2 mm taken from the diefstal footer.

Bron: TerminalStickers_September2026.pdf p1 (CMYK; bleed box in bron nee). Template: trim 104.97 x 30.61 mm, bleed 3 mm, totaal 110.97 x 36.61 mm.

Variabelen: badges = easypark, parkbee, myway, mobian

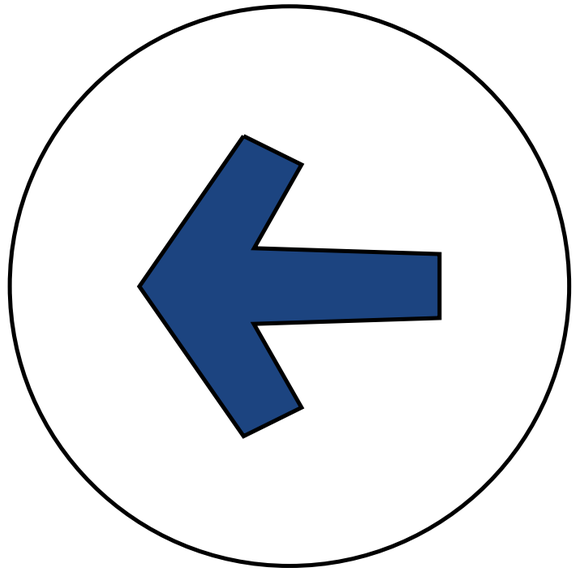

Snijcontour: groep cut-contour, spot ThruCut, 1 pt, 0.2 mm binnen de trim. Proposal: the source has only a 0.25 pt hairline as die line, no ThruCut contour. Radius measured on the die line, to be confirmed by the printer.

Four square navy badges (20.6 mm, radius 22 percent) with EasyPark, ParkBee, MyWay and Mobian, composed from py-atom-badge-square-navy and the third party partner atoms (reference only, source the official files). Order on the sheet: EasyPark, ParkBee, MyWay, Mobian. Sheet TerminalStickers_September2026.pdf (271 x 391 mm, no bleed, no trim marks): a hairline die line (black, 0.25 to 0.74 pt) around each white sticker. The template replaces that line by a ThruCut contour 0.2 mm inside the trim and adds a 3 mm bleed. Source blue CMYK 99.5/85/21.4/6.8 (drift, see tokens.json observed): the template uses the token blue.

Bron: elf printbestanden (source/print). Referentie = getrouwe vectorweergave; template = officiele tokenkleuren, 3 mm bleed, variabelen als live tekst. Labels staan in aparte groepen.

py-comp-bar-footer-callout

py-atom-icon-car-lock

Specificatie

Bron: StickerDiefstalARtisDruk.pdf p1 (CMYK; bleed box in bron nee). Template: trim 140 x 280 mm, bleed 3 mm, totaal 146 x 286 mm.

Variabelen: heading-nl = Let op!; body-nl-1 = Auto op slot en; body-nl-2 = geen waardevolle; body-nl-3 = spullen achterlaten; heading-en = Please note!; body-en-1 = Lock your car and; body-en-2 = remove all of your; body-en-3 = valuables; callout-text = Verdachte situatie? Bel; phone-number = 0900-8844

Snijcontour: groep cut-contour, spot ThruCut, 1 pt, 0.2 mm binnen de trim. Proposal: the source has no cut contour. Corner radius 4.2 mm is the radius seen on the footer bar (4.23 mm); to be confirmed by the owner.

White sticker, no background fill: only the footer bar runs into the bottom bleed (template: to the bleed edge, 3 mm; the source overshoots 4.3 mm). All text is navy token #1A3580 (source drifted blue CMYK 100/86.3/21.5/3.5), Ubuntu, centred, leading 1.2: headings Bold 21.17 mm, body Regular 14.11 mm with bold keywords 'op slot', 'geen waardevolle spullen', 'Lock', 'remove'. Divider navy 1 pt, 127.5 mm. Footer text white 7.76 mm: callout Regular, phone number Bold. The padlock stays light aqua (#68CBDA as sampled, no token). Original copy kept, no spelling errors found. Variables: headings, body lines (bold runs), callout text, phone number. The cut contour is a proposal (no contour in the source).
